*A series of thematic workshops in memory of **Alex B. Gershman***

EURASIP
European Association
for Signal Processing

General Chairs
Ignacio Santamaría, Cantabria
Nikos Sidiropoulos, Minnesota

Technical Chair
Cedric Richard, UNICE

Program Committee
Suleyman Kozat, Bilkent
Paris Smaragdis, UIUC
Nelly Pustelnik, CNRS Lyon
Saikat Chatterjee, KTH
Remi Gribonval, INRIA
Konstantinos Slavakis, SUNY Buffalo

Finances
Marius Pesavento, Darmstadt

EURASIP Liaison
Fulvio Gini, U. Pisa

Local Arrangements
Abdelhak Zoubir, Darmstadt

Graphic Design
Leda Halatsi, Athens

STATOS Thematic Workshop 2016:
Machine Learning from Big Data
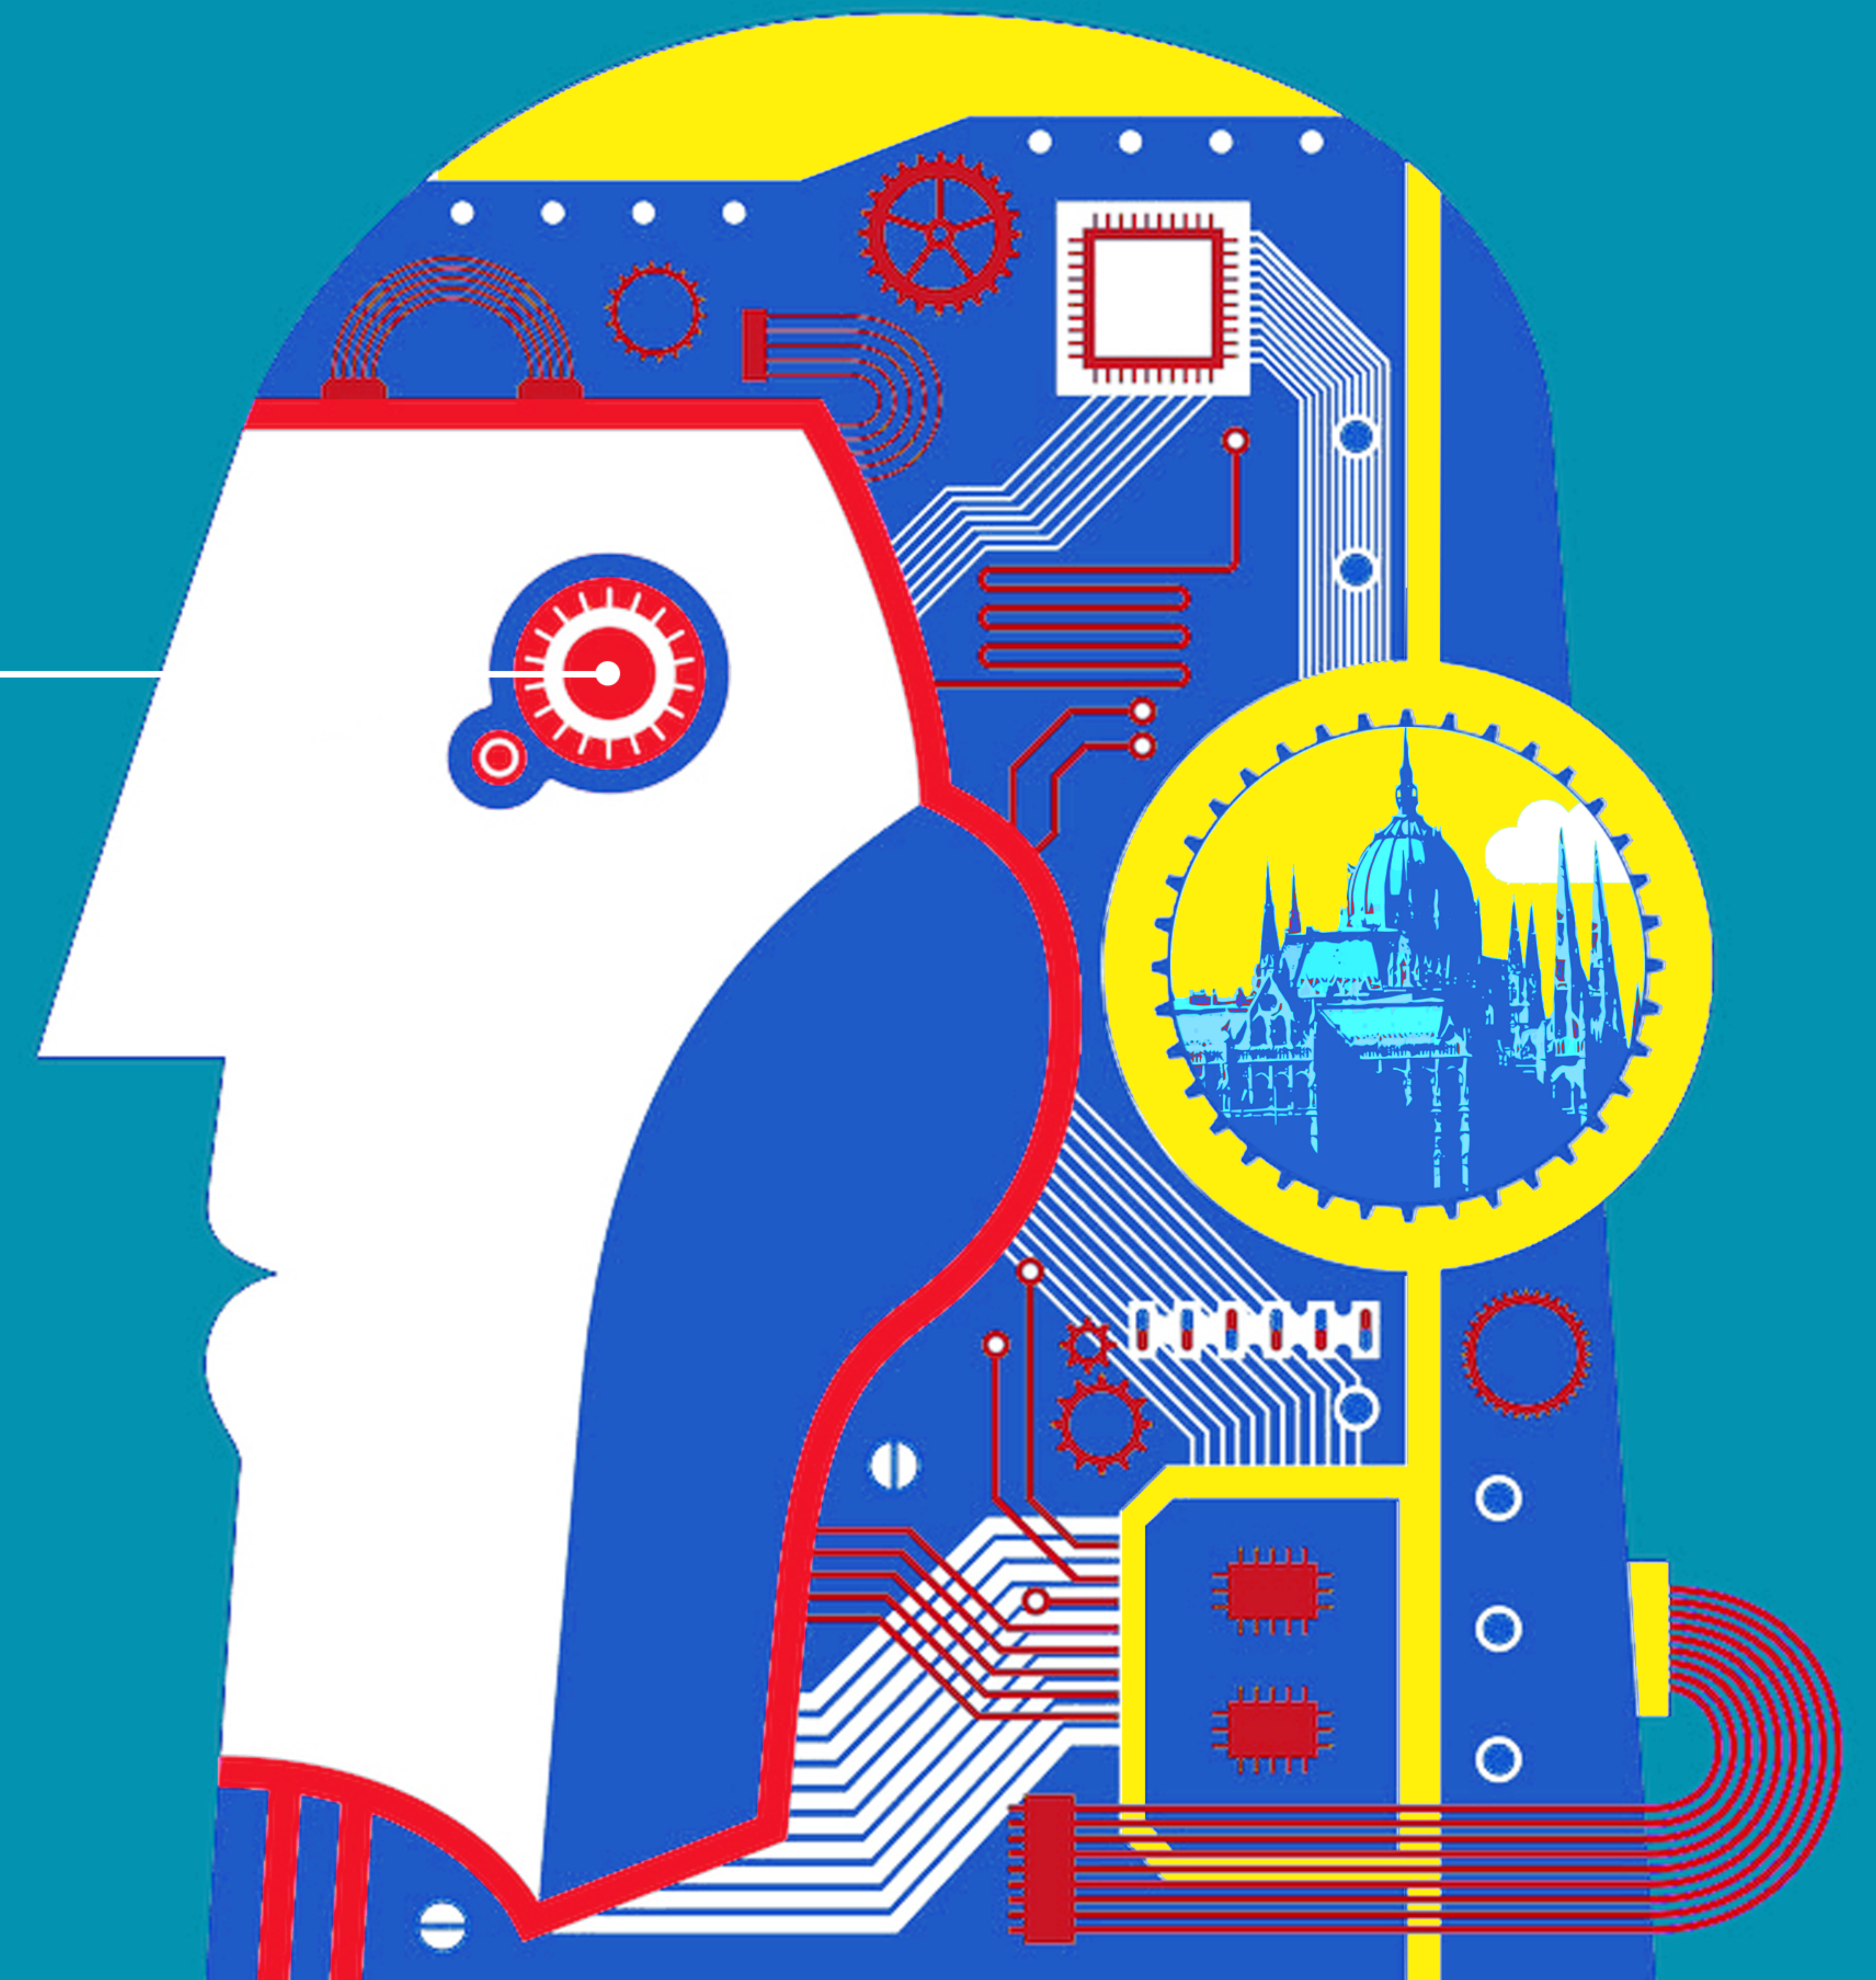

Friday, September 2, 2016

Budapest (right after EUSIPCO)

Featuring a program packed with cutting-edge in-depth 1-hour plenaries by world-class experts in machine learning, big data analytics and optimization.

A rare opportunity to listen, learn and interact with experts in an intense half-day workshop.

EUSIPCO runs until noon on Friday Sep. 2; STATOS will continue right afterwards in the same venue.
Stay overnight for a grand finale – and avoid the outgoing crowd Friday night too.

Workshop webpage: *http://people.ece.umn.edu/~nikos/STATOS2016web.htm*

Co-organized by EURASIP's Special Area Team on Signal and Data Analytics for Machine Learning (SiG-DML) and the Association for the Promotion of Science and Education, a German nonprofit organization supporting children's education.

Register at:
http://statos2016.eventbrite.com

Registration types: Student, Regular and Gold (includes lecture videos)

Keynote Speakers

Romain Couillet
Supelec

Merouane Debbah
Supelec, Huawei

Mario Figueiredo
IST

Georgios Giannakis
U. Minnesota

Stephane Mallat
ENS

Alain Rakotomamonjy
U. Rouen
